### **Basic Kit Includes:**

- (4) Roof Windows
- Base Kit
- Rain Gutters
- Snow Load Kit

Actual Size: **8'2" W x 12'-1/2" L x 8' H**

This **beautiful barn-style** greenhouse gives you a year-round growing space in an attractive, **heavy duty aluminum frame** and **10mm twin-wall panels**.

Engineered to perform in harsh environments. The Grandio Elite's rugged durability, makes it the most insulated of the greenhouses on the market, and it's barn shape design is both **elegant and functional**, and allows plenty of growing space.

Made to meet the highest standards of amateur and professional gardeners, the 1.6mm profile aluminum frame provides a stronger and more durable build than its competitors and won't warp, melt, or crack like the PVC-based barn-style greenhouses. And the heavy-duty construction coupled with 10mm twin-wall polycarbonate panels is the perfect thickness for winter insulation.

A wide range of features and accessories culminates in a well ventilated growing space with gliding double doors, an easy-to-assemble system, and an insulation R-VALUE\* of 1.54 and heat loss U-VALUE\* of 0.65 provide an amazing gardening and greenhouse experience.

The doors hang from above which eliminates jamming and the door wheels are nylon for durability.
